WORK EXPERIENCE

Analyst - Systems Development at Serpro

Feb 2014 - Now

My primary role here is to improve the User Interface and User Experience of WebApps.

- Proposed and implemented Kanban on different teams. A more efficient workflow that increased productivity.
- Created a tool to help project managers prioritize objectives facilitating resource allocation.
- Trained other teams on Scrum, Kanban, AngularJs and SASS.
- Created a component library, standardizing UI over different projects and reducing code duplication.

Front-End Developer at NTV (Agency)

November 2012 - April 2013

- Developed three big online stores. One, for the biggest supermarket of the region.
- Created a reusable responsive theme to use across different online stores.
- Implemented secure integration with payment gateway for e-commerce.

Freelance Developer at Lápis Digital (Agency)

March 2012 - August 2012

- Created portals and a e-learning platform.
- Designed a Joomla extension to manage online classes.

Java Web Developer at Unioeste

January 2010 - December 2011

Co-creator of SIGETRANS, a system that track transit accidents.

- Responsible for integrating the system with the fire department, emergency care units and hospitals.
- Implemented a visualization tool to better convey accident reports.
- Wrote several white papers related to this project.

VOLUNTEER

Teacher at Guarda Mirim

January 2008 - January 2010

Digital inclusion of teenagers through training on free software.

EDUCATION

Bachelor Computer Science at UNIOESTE

January 2007 - July 2013
